

DELL™ LEARNING SYSTEM (DLS)

OVERVIEW

The Dell Learning System provides a total e-Learning solution with high-quality Dell hardware, our latest course content, an easy-to-use Learning Management System (LMS) and ongoing technical support. The end result is a cost-effective solution that can make it easy for IT administrators and employees alike to enjoy the benefits of e-Learning.

THE DELL LEARNING SYSTEM:

Learning On Demand

- Allows for up to 200 concurrent students
- Provides training content on a Dell PowerEdge™ server
- Secure, multimedia, behind-the-firewall training
- Easy-to-navigate LMS with administrative and reporting capabilities
- New and updated courses are added at no extra charge
- Courseware integration capability
- Ability to incorporate your business branding
- Includes Dell's excellent technical support and deployment services
- Learning takes place on the student's existing PC so there is no central workstation footprint
- Printable online study guides to supplement course content
- Educators' Professional Development option also available

Benefits

The Dell Learning System offers an end-to-end program and comes complete with a Dell PowerEdge server loaded with training content. It is ready-to-install and is priced per box so you don't have to deal with complex multi-user licenses. And the Dell Learning System resides behind your organization's firewall, virtually eliminating direct, external security threats and making implementation easy and fast.

Administrator Access

- Without even leaving their desks, administrators can control the dissemination of course material and student access to content in addition to many other important functions.
- Create student lists and assign and remove course assignments
- Create registration codes and enable student self-registration
- Create student groups to administer training to many students simultaneously
- Check updates for new courses and LMS updates
- Maintain current subscriptions
- LDAP authentication for easy management using only one user database
- Multi-tier Administration Profiles enable simplified control and management

SIMPLIFIED AND SECURE TRAINING

The Dell Learning System puts you in control of your staff training initiatives while making it easy and cost-effective. By managing your e-Learning courses from behind your firewall, you virtually eliminate the risk of relaying sensitive material to employees over the Internet. It's easy for administrators to distribute and keep track of courses as well as update existing and new courses as they become available. It's easy for users to participate in media-rich, engaging training when and where they need it. And it's easy for IT staff to incorporate an effective e-Learning solution into your infrastructure.
